

Medi-Cal Rx List of Covered Enteral Nutrition Products – Effective January 1, 2021

December 18, 2020

Effective for dates of service on or after January 1, 2021, the existing Medi-Cal Fee-For-Service List of Enteral Nutrition Products is updated with certain product additions, deletions, and costs. Medi-Cal Rx claims submitted on or after April 1, 2021, for enteral nutrition products require prior authorization and must be a product on the updated *Medi-Cal Rx List of Covered Enteral Nutrition Products*.

The updated list is attached below, along with the list of deletions effective January 1, 2021. Effective December 18, 2020, the list is also available in Excel® format on the [Medi-Cal Rx Web Portal](#) in the [Forms and Information Section](#). Note that the list attached in this bulletin is current as of December 18, 2020. Any future changes to the list will be made in the Excel spreadsheet only. The spreadsheet will also be linked in the *Medi-Cal Rx Provider Manual*.

Medi-Cal Rx List of Covered Enteral Nutrition Products

This spreadsheet contains **enteral nutrition products eligible for reimbursement** under Medi-Cal Rx when billed by Medi-Cal Fee-For-Service (FFS) pharmacy providers. Refer to the Enteral Nutrition section of the *Medi-Cal Rx Provider Manual* for coverage and established criteria, quantity limits, and additional billing information. This spreadsheet is subject to change with notification in the provider bulletins. "EAC" (Estimated Acquisition Cost) is the maximum product cost reimbursed. The manufacturers have guaranteed, upon request, that Medi-Cal FFS pharmacy providers can purchase the products at or below the Maximum Acquisition Cost (MAC) for dispensing to eligible Medi-Cal recipients and bill to Medi-Cal Rx. **To receive reimbursement, the NDC/UPC on each product package dispensed must be an exact match to a product NDC/UPC in this spreadsheet and the NDC billing code submitted on the claim. In addition to the established criteria, the product-specific criteria in this spreadsheet must be met.**

Product Category	Sub-Category	Manufacturer	Product Label Name	Product-Specific Criteria	Caloric density kcal/g or ml	Protein per g or ml	NDC Billing Code	UPC Number per Item (For Reference Only)	UPC Number per Case (For Reference Only)	MAC per gm or ml	EAC per gm or ml	Effective Date of Change	Description of Change
