

Medical Supplies: Continuous Glucose Monitoring Systems and Disposable Insulin Delivery Devices Updates

September 30, 2022

What Pharmacy Providers Need to Know

The purpose of this alert is to notify pharmacy providers of a delay in implementation of new policies regarding diabetic supplies including changes to Continuous Glucose Monitoring (CGM) Systems ([Diabetic Supplies: Updates to Continuous Glucose Monitoring Systems](#)) and covered Disposable Insulin Delivery Devices (DIDD) ([Medical Supplies: Updates to the List of Covered Disposable Insulin Delivery Devices](#)). The changes added Medtronic CGM systems and Omnipod 5 G6 Intro Kit, Omnipod 5 G6 Pods, and Omnipod DASH Intro Kit as Medi-Cal Rx National Drug Code (NDC)-billed pharmacy benefits, effective October 1, 2022.

The implementation date of these policies was originally published as October 1, 2022 but has now been delayed for further system testing of the benefit configuration. Medi-Cal Rx will announce via a published alert when the claims adjudication system is prepared to appropriately adjudicate submitted claims.

What Pharmacy Providers Need to Do

Until the new policies are implemented, pharmacy providers are advised to dispense the affected CGM and DIDD products to eligible beneficiaries based on currently published Medi-Cal Rx coverage criteria found in the [Medi-Cal Rx Provider Manual](#) on the [Medi-Cal Rx Web Portal](#). Pharmacy providers are advised to hold the claim submission until further notice at which time claims can then be adjudicated, retroactive to the October 1, 2022 effective date.
